

MANUFACTURING THE PERFECT PROCESS SOLUTION

Manufacturers are always on the hunt for opportunities to increase operational efficiency and productivity. A process management solution like Issuetrak can streamline business workflows, defining procedures for every situation.

CUSTOMIZED PROCESSES:

Create unique workflows for different situations, whether simple checklists or branching procedures like employee onboarding.

TOTAL VISIBILITY:

Provide oversight across entire business processes, from initial assignment to workflow, issue escalation, and resolution.

COMPREHENSIVE REPORTING:

Dashboards offer granular insight into business performance, open incidents, average response times and more.

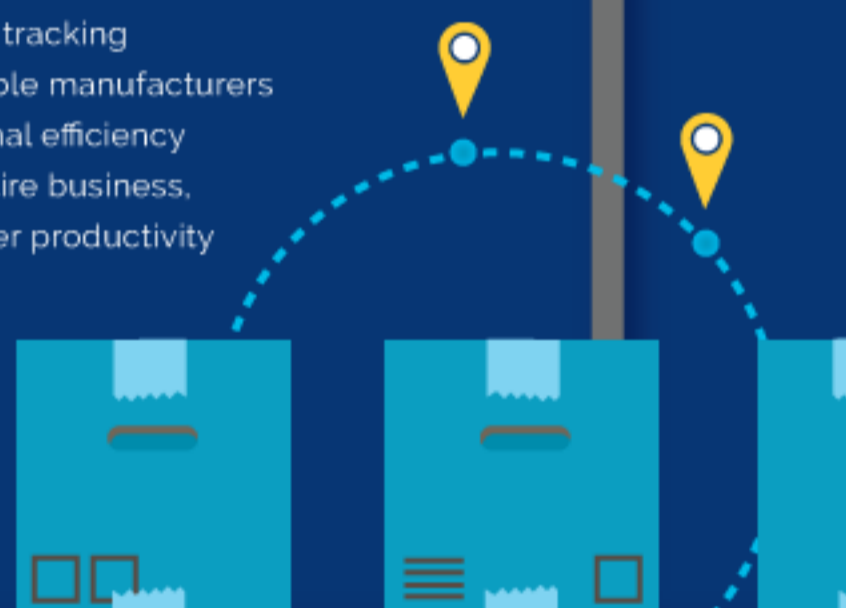

CHANGE MANAGEMENT:

Use tasks to create branching processes to capture necessary approvals, back out options, and final change results.

ORGANIZATIONAL EFFICIENCY:

Automation and tracking capabilities enable manufacturers to achieve optimal efficiency covering the entire business, resulting in better productivity and ROI.

UP-TO-DATE ISSUE PROGRESS:

Allow stakeholders to stay on top of issues at all times. Auto-assignment and escalation features ensure nothing slips through the cracks.

Manufacturing companies need to run like well-oiled machines. A process management solution introduces automation and visibility into internal workflows, **streamlining critical tasks from end to end.**
