

5 TIPS

HOW TO START PRINTING WITH YOUR RAISE3D PRO2 SERIES PRINTER

1

UNBOXING VIDEO GUIDE

Go to our Youtube Channel @Raise3D and check out the Unboxing Guide. This will go over all the steps necessary to unbox your printer (you don't want to leave those Z clamps on).

2

QUICK START GUIDE

Go ahead and read through the Quick Start Guide that's included with the machine. This will go over all the necessary steps for setup and the parts that are included in the accessories box.

3

IDEAMAKER SLICING SOFTWARE

Go to our website and download our slicing software ideaMaker. The ideaMaker manual and release notes will have a full list of details on ideaMaker's features.

4

CHECK THE Z OFFSETS

Go ahead and check the Z offsets on the machine. The steps for this procedure are covered in the Quick Start Guide, and there is also a video guide on YouTube.

5

OPEN FILAMENT PROGRAM

If you want to start printing with 3rd party filaments, go ahead and check out our Open Filament Program on our website. This will have a full list of tested and compatible filaments that have downloadable templates you can import into ideaMaker for your own use.
